

Healthcare solutions

Leading medical technology and pharmaceutical companies turn to Flex for our innovative design expertise, advanced manufacturing and supply chain services to build and deliver products to market faster, more reliably and sustainably to transform healthcare and improve lives.

Making great products that create value and improve lives, together

We offer a unique set of capabilities that enable healthcare companies to meet their goals. We partner with our customers to create business value across the product lifecycle, from design to end-of-life.

Capitalize on innovation cycles and accelerate time-to-market

Lower risk and increase resiliency with global footprint

Create value across the product lifecycle

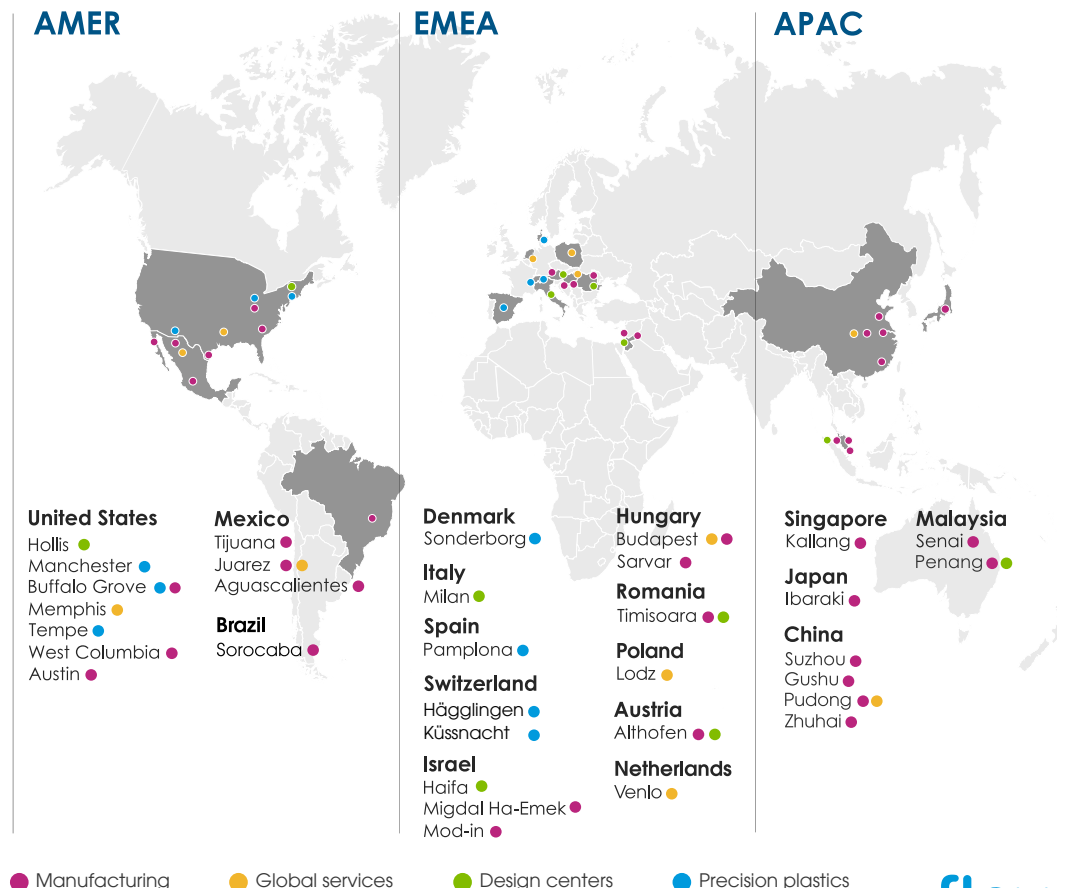

Integrate sustainability from design to end-of-life

Advanced manufacturing and design footprint for global scale and regional reach

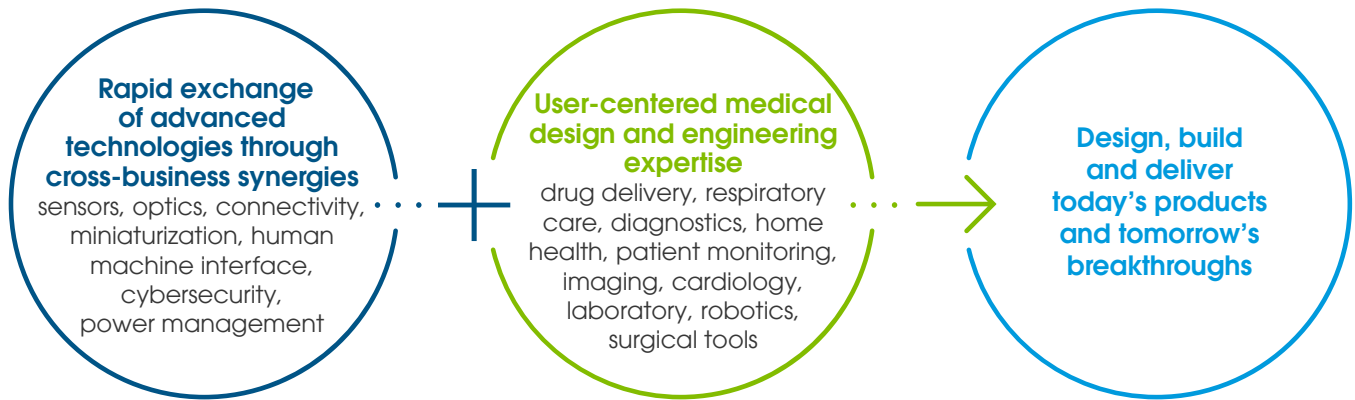

With more than 650 medical engineers across 4 regions and 14 countries, our global footprint enables you to get to market faster and scale your products rapidly, when and where you need them, to meet critical healthcare needs.

- 6 design and engineering sites
- 6 global services
- 21 manufacturing
- 7 precision plastics
- 15 FDA registered entities
- 31 ISO13485 designated sites

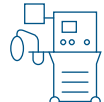

Accelerating time-to-market through deep technology and domain expertise

We enable you to specify, conceptualize, develop, test, and sustain products through the combination of our design and engineering expertise and cross-business synergies.

Strategic partner across diverse markets

We partner with industry-leading companies across diverse markets to solve the world's most complex healthcare challenges.
